We need access to modify and compose <https://www.googleapis.com/auth/gmail.modify> and <https://www.googleapis.com/auth/gmail.compose>, in order to create emails through our template system that generates dynamic emails that include property information and auto-generated contracts with the purpose of keeping our clients up to date with their emails and making the necessary connections with their contacts and properties in our CRM.

We need access sending <https://www.googleapis.com/auth/gmail.send> in order to deliver the previously generated emails, attachments, and arrive at their destination like they are coming from our clients' emails.
